<sup>1</sup> **Grade Requirements:** Students must earn a grade of "C-" or better in all core neuroscience coursework (CHEM 1035 General Chemistry, CHEM 1036 General Chemistry, NEUR 1004 Neuroscience Orientation Seminar, NEUR 2025 Introduction to Neuroscience, NEUR 2026 Introduction to Neuroscience, NEUR 2035 Neuroscience Laboratory, NEUR 2036 Neuroscience Laboratory, NEUR 4044 Neuroscience Senior Seminar, PSYC 1004 Introductory Psychology) or the equivalent coursework. Students must also earn a "C-" or better in BIOL 1105 Principles of Biology, BIOL 1106 Principles of Biology, BIOL 1115 Principles of Biology Laboratory, BIOL 1116 Principles of Biology Laboratory, MATH 1225 Calculus of a Single Variable, and MATH 1226 Calculus of a Single Variable. Only two attempts, including course withdrawals with a grade of "W," are allowed for each core neuroscience course, BIOL 1105 Principles of Biology, BIOL 1106 Principles of Biology, BIOL 1115 Principles of Biology Laboratory, BIOL 1116 Principles of Biology Laboratory, MATH 1025 Elementary Calculus, and MATH 1026 Elementary Calculus.

<sup>2</sup> **Prerequisites:** This check sheet contains courses that have at least one prerequisite that may not be included as part of this degree. Please see your advisor or consult the Undergraduate Course Catalog for more information.

<sup>3</sup> Because PSYC 1004 Introductory Psychology is in the "Core" requirements, it *may not* double count as a concept 3 course.

<sup>4</sup> Courses may not double count with the credits chosen for any other CBNU requirement.

<sup>5</sup> If NEUR 4994 Undergraduate Research is selected, research must total to 3 credits.

## Graduation Requirements

Student must complete a minimum of 120 credit hours with an overall GPA of 2.0 and a minimum in-major GPA of 2.0. For purposes of GPA computation, courses IN-MAJOR will include Core requirements, Major requirements, Restricted Electives, BIOL 1105 Principles of Biology, BIOL 1106 Principles of Biology, BIOL 1115 Principles of Biology Laboratory, BIOL 1116 Principles of Biology Laboratory, and MATH 1025 Elementary Calculus-MATH 1026 Elementary Calculus.

## Acceptable Substitutions

- CHEM 1035 General Chemistry-CHEM 1036 General Chemistry: CHEM 1055 General Chemistry for Chemistry Majors-CHEM 1056 General Chemistry for Chemistry Majors
- CHEM 1045 General Chemistry Laboratory-CHEM 1046 General Chemistry Laboratory: CHEM 1065 General Chemistry for Chemistry Majors Lab-CHEM 1066 General Chemistry for Chemistry Majors Lab

- MATH 1025 Elementary Calculus-MATH 1026 Elementary Calculus: MATH 1225 Calculus of a Single Variable-MATH 1226 Calculus of a Single Variable
- NEUR 1004 Neuroscience Orientation Seminar: Any approved FYE course
- PHYS 2205 General Physics, PHYS 2215 General Physics Laboratory: PHYS 2305 Foundations of Physics
- PHYS 2206 General Physics, PHYS 2216 General Physics Laboratory: PHYS 2306 Foundations of Physics
- STAT 3615 Biological Statistics, STAT 3616 Biological Statistics : STAT 3005 Statistical Methods, STAT 3006 Statistical Methods

## Double Majors/Minors

The School of Neuroscience offers majors in Cognitive and Behavioral Neuroscience, Clinical Neuroscience, Computational and Systems Neuroscience, and Experimental Neuroscience. Courses for these majors overlap slightly. Therefore, students may not pursue multiple majors within the School.

## Foreign Language Requirement

Students who did not successfully complete at least two years of a single foreign, classical, or sign language during high school must successfully complete six semester hours of a single foreign, classical, or sign language at the college level. Courses taken to meet this requirement do not count toward the hours required for graduation. Please consult the Undergraduate Catalog for details.

## Prerequisites

This check sheet contains courses that have at least one prerequisite that may not be included as part of this degree. Please see your advisor or consult the Undergraduate Course Catalog for more information.

## Progress Toward Degree Policy

After attempting 72 credits, students must have completed BIOL 1105 Principles of Biology, BIOL 1106 Principles of Biology, BIOL 1115 Principles of Biology Laboratory, BIOL 1116 Principles of Biology Laboratory, CHEM 1035 General Chemistry-CHEM 1036 General Chemistry, NEUR 2025 Introduction to Neuroscience-NEUR 2026 Introduction to Neuroscience and NEUR 2035 Neuroscience Laboratory-NEUR 2036 Neuroscience Laboratory; have a minimum overall GPA of 2.5; and have completed at least 24 credits that apply to the Pathways to General Education requirements.

## Terminology

**Pathways Requirements:** Pathways to General Education is defined by the university as “A vibrant, flexible, and innovative general education program that provides a coherent and meaningful learning experience and allows students to integrate the learning for use throughout their lifetimes.”

**Core Neuroscience Requirements:** Core neuroscience requirements are those requirements that must be fulfilled by all students in the School of Neuroscience, regardless of major.

**Major Requirements:** Major requirements are those requirements that are unique to the CBNU major and do not apply across all School of Neuroscience majors.

**Restricted Elective:** Restricted elective courses provide students the autonomy to select 12 or more credits of coursework within an approved list to count towards the students’ degree requirements. These courses expand on the depth and breadth of the CBNU major.

**Free Elective:** Free elective credits may consist of any credit-bearing Virginia Tech coursework to ensure that students reach the 120 credits required by the university to earn a bachelor’s degree. Coursework that does not apply elsewhere towards the degree will apply here (this includes non-duplicative coursework for double majors, minors, or AP coursework that does not count elsewhere towards the degree).
